

Purchaser of X-52x

In June 2023, <TOPCON Experience Road Show> was held in Jeonju, Jeollabuk-do. Sokkia Korea is continuously conducting experience road shows where you can experience the 3D MC level system in various cities across the country. At the Jeonju Road Show, we had time to meet customers who purchased the X-52x leveler and share their questions about TOPCON.

pipe gradient because it has a Korean interface, which is easy and simple, and can be operated right away without the need for adaptation. He said "After using the 2D system first, I am considering upgrading to the 3D system."

We were able to hear detailed reasons for purchasing the X-52x and their reviews from customers who participated in the roadshow.

The owner who operates heavy equipment in Jeonju, expressed high satisfaction with TOPCON level X-52x, saying that it can be used in various ways in pipelines or gradient work that require the exact level, and that the precision is better than expected. Another customer who participated in the interview said that he expects that it can be used in various ways when working with a sewage

The X-52x introduced in this road show is a 2D excavator system that can be upgraded to a 3D system in the future and can efficiently perform various tasks such as digging pipes, embankment, law surfaces, flat surfaces.
