

SDL1X

High-End Digital Level
0.2mm Standard Deviation for 1km Double-run Leveling

Ultimate Benchmark

The SDL1X is designed to achieve the highest precision and productivity in leveling and height measurement applications. From Intelligent Auto Focus to wireless operation, a number of innovative technologies are implemented for unmatched reliability while eliminating error factors during measurement. The SDL1X sets the ultimate benchmark for the precision digital levels.

■ Saving Measurement Time by up to 40%

- The combination of advanced "Auto Focus" and "View Finder" dramatically increases measurement speed.
- Measuring time – from sighting staff to completion of data storage – can be reduced by up to 40% compared to manual focus digital levels.

■ Seamless Switching Between Auto Focus and Manual

- No need to switch the focusing mode.
- Trigger key operation automatically starts Auto Focus.
- Manual focusing is possible at any time by rotating the focusing knob that supersedes the Auto Focus.

■ View Finder for Quick Sighting

- Innovative View Finder provides fast, easy and accurate sighting to the staff.
- In combination with Auto Focus, the SDL1X drastically reduces eye fatigue.

Eight innovative features never before available in the industry:*

1. 0.2mm precision (ISO17123-2)
2. Auto Focus for high-end digital level
3. View Finder for quick sighting
4. Remote Trigger for wireless operation
5. Dual-axis Tilt Sensor that ensures precision
6. SD card slot for data storage
7. 100m (320ft.) Bluetooth® wireless communication
8. BIS30A staff with $\pm 0.1 \text{ ppm/}^\circ\text{C}$ linear expansion coefficient

* As of September 1, 2011

When Precision Has Top Priority, and Measurement Speed Also Matters, SDL1X is the Ideal Digital Level that Fully Satisfies Both Demands

■ Intelligent Auto Focus

- The SDL1X automatically focuses exclusively on the RAB-Code staff.
- This technology completely eliminates false focusing on undesirable objects, enhancing measurement efficiency and reliability.
- Furthermore, Auto Focus eliminates the incomplete focusing that often causes inaccurate measurement with digital levels.

■ Remote Trigger

- The wireless Remote Trigger DLC1 prevents accidental jolts from touching the instrument.

DLC1

■ Dual-axis Tilt Sensor

- The liquid dual-axis tilt sensor alerts the users by LCD display and beeps when instrument tilt exceeds $\pm 8.5'$, disabling measurement to avoid misreading.
- The LCD graphic circular level facilitates instrument setup.

■ Measurement and Recording Programs

- Onboard software supports height difference measurement and data recording in the following procedures:

BF, BFFB, BBFF, BFBF, aBF, aBFFB, aBFFB

(B: Backsight, F: Foresight, a: alternating)

- Measurement tolerance can be set in each route for on-site accuracy checks.

■ Up-to-date Data Memory and Interface

- 10,000-point internal memory.
- USB port and SD card slot for improved usability.

■ 100m (320ft.) Bluetooth Wireless Modem (Optional)

- License-free Bluetooth technology enables wireless operation via various devices such as a data collector.

■ New Super-Invar Staff for 0.2mm Precision

- The SDL1X achieves the highest in precision when combined with the New Super-Invar RAB-Code Staff BIS30A that boasts the industry's lowest linear expansion coefficient $\pm 0.1 \text{ ppm}/^\circ\text{C}$.
- Ideal for first-order leveling as well as sub-millimeter height and subsidence measurement applications.

Battery level display		4 levels and low level message	
Auto power cut-off		30 minutes after operation / none, selectable	

^{*1} Standard deviation for 1km double-run leveling.

^{*2} Conditions for the highest accuracy: Low level of atmospheric turbulence, stable ambient temperature, no direct sunlight on instrument and staff.

Standard Accessories

- BDC72 rechargeable battery ● CDC77 quick charger with EDC113A/113B/113C power cable
- DLC1 Remote Trigger* ● Tool kit ● Operator's manual ● Carrying case

*Optional Accessory for standard model

Optional Accessories

- DE28 diagonal eyepiece (32x) ● DE29 diagonal eyepiece (44x) ● DOC129 interface cable
